

## Using a Cylinder - Good Practices While Receiving a Cylinder

- ▶ Check that the cylinder has been delivered with the company seal and safety cap intact
- ▶ If you are not sure about usage, please ask the delivery person for a demonstration

### While connecting a Full Cylinder

- ▶ Remove the safety cap from the valve
- ▶ Check the cylinder valve and other joints for any leaks
- ▶ Make sure that
  - ▶ the regulator is turned to the 'OFF' position
  - ▶ all valves on the appliance are closed
  - ▶ the connecting pipe to the appliance is correctly fitted
  - ▶ the valve is clean and free from debris
- ▶ Put regulator on top of the cylinder valve. Place hand on top of the regulator and push down firmly and vertically until you hear a click
- ▶ Once the regulator is correctly fitted, turn knob to 'ON' position as directed by manufacturer instructions on the regulator

### While using LPG appliance

- ▶ Turn the regulator knob to 'ON' position
- ▶ Wait and smell for LPG leaks
- ▶ Check for any leaks on the regulator/ tube/ tube joint/ LPG appliance joint
- ▶ Strike the match first, open the knob and light LPG appliance
- ▶ After use, close the knob of the LPG appliance

### While disconnecting an Empty Cylinder

- ▶ Put off all the flames and fires in the room/ kitchen
- ▶ Close all the knobs of the LPG appliance
- ▶ Never disconnect the regulator with the knob in open position
- ▶ Turn the knob of the regulator to 'OFF' position
- ▶ Pull the regulator out or pull up the ring and lift the regulator out
- ▶ After disconnecting, replace the safety cap onto the cylinder valve. Press the cap firmly down until a 'click' is heard. Now it is safe to remove the empty cylinder
